---

## Academic Projects

**Title** : *Learning Galaxy*  
**Platform** J2EE **Duration:** 1 Month

This online portal is to provide a platform where faculty can upload specific module's study materials and assignments for students and a student can access it from any location and it also provides online exam portal for students. It is also useful in the environment where different services are blocked for some security reasons. The system is developed using 3-tier approach with a back-end database, middle tier and front-end as java

---

**Title : LoopIn (Internal Portal) of Mindcraft**

**Platform J2EE**

**Duration: 6 Month**

MindCraft's LoopIn is a popular Social-Collaboration Enterprise Portal created to enable better communication and a higher level of knowledge sharing between people. LoopIn provides a forum for employees to create a personalised account, share content, and to keep themselves abreast of the latest events and updates of the organization. They can also engage in a dialogue with their peers. LoopIn is designed to increase sharing and peer-recognition and to foster effective team cultures.

.....

**Title : Virtual Classroom**

**Platform J2EE**

**Duration: 1 Month**

Virtual classroom system provides a perfect environment for online training and gives a feel of being in the classroom itself. VCR integrates the best learning practices with the power of internet to provide a dynamic learning platform to the learner. VCR has all the advantages of the conventional e-learning plus its live. Basically, it allows you to add live, real time interaction to distance learning.

.....
