FINAL YEAR PROJECTS:

MSc.IT – Semester IV

Project Title: High Performance Compute Cluster (HPCC)

Description: There are many computationally intensive applications which require more time for processing when done on single machine. For Example: Large Financial calculations. Therefore we developed a **High Performance Compute Cluster** to run **applications in Parallel** by harnessing the computing power of multiple machines to work as a single system. In this way time consuming processes can be done in much faster way.

Technology used: Microsoft High Performance Computing Pack 2012 Update 3 Release 2 software installed on nodes having base operating system as Windows Server 2012 Data Center Edition. Application used is Excel Workbook built with VBA macros that utilize a HPC cluster to run calculations in parallel.

BSc.IT –Semester VI

Project Title: Online Cab Booking System (Website) for Mumbai Darshan

Description: Developed a **website** named **MUMBAI-KI-SAWAARI.COM** to let customer’s book taxi **for Mumbai Darshan** to visit various tourist attractions in Mumbai City. It will also carry out all Admin operations required to provide taxi service by the operator.

Technology used: Asp.Net with C# using Visual Studio 2010 Professional with back end connectivity to SQL database server 2008. Testing of the website carried out with Selenium IDE tool.
