

SYMA

Advanced Scrum Master

Advancing Scrum Master servant leadership with
the Scaled Agile Framework®
Certified SAFe® Advanced Scrum Master

Advanced Scrum Master

Course Duration

2 Days

Course Level

Advanced

Course Takeaways

- Prepares current Scrum Masters for their leadership role in facilitating Agile team, program, and enterprise success in a Scaled Agile Framework (SAFe®) implementation.
- Covers facilitation of cross-team interactions in support of program execution and relentless improvement.
- Enhances the Scrum paradigm with an introduction to scalable engineering and DevOps practices, the application of Kanban to facilitate the flow of value, and supporting interactions with architects, product management, and other critical stakeholders in the larger program and enterprise contexts.
- Offers actionable tools for building high-performing teams and explores practical ways of addressing Agile and Scrum anti-patterns in the enterprise.

Course Registration Includes

- Attendee workbook
- Preparation and eligibility to take the SAFe® 5 Advanced Scrum Master (SASM) exam
- One-year membership to the SAFe Community Platform
- Course certificate of completion

- Program Manager

Scrum Master

SAFe® 5 Advanced Scrum Master Exam

Completion of this course gives you access to the exam and all related study materials as part of your Learning Plan in the SAFe Community Platform. Attending both days is compulsory to qualify for the exam.

Note that attending the course does not guarantee passing the exam.

Exam Prerequisite Skills

Experience working in a Lean-Agile environment

Exam Details

Exam name – SAFe® 4 Advanced Scrum Master Exam – or – SAFe® 5 Advanced Scrum Master Exam

Exam format – Multiple choice; Multiple select

Exam delivery – Web-based (single-browser), closed book, no outside assistance, timed

Exam access – Candidates can access the exam within the SAFe Community Platform upon completion of the SAFe® Advanced Scrum Master course

Exam duration – Once the exam begins, candidates have 120 minutes (2 hours) to complete the exam

Number of questions – 60

Passing score – SASM 4 = 42 out of 60 (70%); SASM 5 = 44 out of 60 (73%)

Language – English

Exam cost – First exam attempt is included as part of the course registration fee if the exam is taken within 30 days of course completion. Each retake attempt costs \$50.

Retake policy – Second attempt on exam can be done immediately after first attempt. Third attempt requires a 10-day wait. Fourth attempt requires a 30-day wait.

Advanced Scrum Master

Exam Study Materials

The exam measures knowledge and skill related to the job role. We recommend using different resources to prepare:

Course materials – The course materials can be downloaded from the SAFe Community Platform and can be used for references anytime.

Study guide – This comprehensive guide details the job role and all resources related to the exam, including a detailed reading list. Access is available through the Learning Plan in the SAFe Community Platform upon course completion.

Practice test – The practice test with the same number of questions, level of difficulty, and time duration is a part of the Learning Plan in the SAFe Community Platform and can be attempted any number of times free of cost. *This is not the actual exam, and passing it does not guarantee success on the certification exam.

Sample Questions – An online, flashcard style version of the sample questions can be accessed in the study guide.

Advanced Scrum Master

Your SAFe® 4 / SAFe® 5 Release Train Engineer Certification includes

- Certified SAFe® Advanced Scrum Master PDF certificate
- Certified SAFe® Advanced Scrum Master digital badge to promote the accomplishment online
- One-year membership to the SAFe Community Platform, which includes access to the SASM Community of Practice
- Access to Meetup groups and events that provide connections to other Certified SAFe Professionals
- A variety of learning resources to support certified professionals during their SAFe journey

Benefits of becoming a Certified SAFe® 5 Release

- 1 Apply SAFe principles to facilitation, enablement, and coaching in a multi-team environment
- 2 Build a high-performing team and foster relentless improvement at scale
- 3 Address Agile and Scrum anti-patterns
- 4 Support the adoption of engineering practices, DevOps, and Agile architecture
- 5 Learn to apply Kanban eXtreme Programming (XP) frameworks to optimize flow and improve the team's work
- 6 Facilitate program planning, execution, and delivery of end-to-end systems value
- 7 Support learning through participation in Communities of Practice and innovation cycles
