Project Details:

Project Name: Law Source
Team Size: 1
Front end: J2EE and Android
Backend: MYSQL.

Description:

Law and justice are very important in any society. The Indian law and justice are based on the foundation of our constitution. The Indian constitution provides protection and liberty to every citizen. According to the current system there is a lack of awareness about the law among common people. Accessibility to the law and the lawyers is limited. People are not aware about the rights and legal remedies available for them. They also fear about the problems in filing cases against criminals and any such kind of activities.

Project Details:

Project Name: Office Management System
Team Size: 3
Front end: Php
Backend: MYSQL.

Description:

This project is to develop an Office Management System for the Automation of Office Software. Office Management System deals with admission verification, semester registration verification and generation of transfer certificate and conduct certificate. Educational institution needs to monitor the student profiles. Student admission and semester registration are basic processes of an institution. So, office staff should verify these details. Also, when a student leave this institution, he needs the transfer certificate and conduct certificate.

Project Name: Human Resource Management System
