- Developed a web-based Project named **"E-Home Builder and Designer"** a website that show online Builder and Designer information at any particular city using *JEE Technology* At the time of Collage training period.

Project # 1: BancMate (CBS)

Languages	:	Struts 1.x, EJB 2.0, JSP
Database	:	SQL Server 2008 R2
Web Server	:	JBoss-4.2.0.CR2
Role	:	Java Developer

Description   : Its purpose is to draw a computerized banking system. CBS 24x7 Enterprise Web Application provides a Central repository of Database, which is available for all the Branches of Bank. CBS is a component based modular & has been built on open industry standard platform J2EE. These solutions leverage industry standard protocol & methodologies to seamlessly interface with multiple back office systems & enable banks to offer a single point access to various products. It is inherently platform independent database, hardware & OS. By implementing a single e-business platform to support consumer, business, and trade clients, and banks can leverage their IT infrastructure investments across multiple market segments.

Responsibilities:
- Analysis and Design
- provide invest interest functionality
- Also Authorize all management
- Co-ordinate with other team members to resolve issues.

<u>**Project #2:**</u> **EPM (Enterprise Project Management)**

Languages	**:**	Struts 2.x, Hibernate, JSP
Database	**:**	SQL Server 2008 R2
Web Server	**:**	JBoss-4.2.0.CR2
Role	**:**	Java Developer

Description **:** The aim of this project is to perform management of employees Easily and in efficient way it involves modules like in report module We generate employee attendance, employee, Productivity report etc. In project module we find assigning points to employee from where employee can fill their time sheet close their point, Point release status, point release status where after porting status can be Updated and concerned authorities can be informed through mail. Modules to show personal detail of employees.

Responsibilities:

- Analysis and Design
