**Sr. Software Engineer**

**Proactivity Suit :**

**PROJECT SUMMARY:**

**Dakotasoft (Desktop and Mobile) – e2Serv Ventures Private Limited**

**Role** :  Lead

**Team Size** 10

**Technology** Asp.net, C#, MVC, Sql, HTML/5, CSS/3, JavaScript, jQuery, jQuery-Mobile

**Description**: It is a EHS(Environment Health and Safety) Compliance product. used by top chemical , gas companies, etc. Dakotasoft suite was made way back in 2004-2009 and was purely worked on IE 7 only. My job was to make the product cross-browser and asynchronous as possible. Removing the classic tags and replacing with html5, css3, jQuery, ajax and aspx everywhere. Removing the adobe flex/actionscript object from the product and making a same object completely in jQuery and use Dynamic sql scripts for receiving data from webmethods. Also I have worked on indexed db , web worker. Client side caching. Involved in the using Git for source code management. And for Project management and version control we used TFS (Team Foundation Server).

**Responsibilities**

✓ Plan, coordinate and conduct multiple complex software engineering activities

✓ Handle offshore client requirements, scrum meetings.

✓ Create and participate in software planning and estimating, status monitoring and reporting

✓ Working on database and server side scripting using C#, SQL Server.

✓ Devise new approaches, apply existing criteria in new ways and draw conclusions from comparative situations

✓ Software design and investigating. Make recommendations on the assessment of tools and software products Participate in the development of several major software releases.

✓ Building the site using Jenkins , configuration of the sites, coordinate with QA for bug solving.
