ProjectsUndertaken

Sr. No.	Title	Description	Language/Tools
1.	**A PLCC Based Anti-Theft System.**	The project describes cost-effective technique for the implementing a power anti -theft system by exploiting remote RF concept and using existing power line as a physical medium. The project is about power-line communication over the low-voltage grid, acting as the carrier, trying to achieve higher bit-rates and more reliable communication over the power lines. The main advantage with power-line communication is the use of an existing infrastructure.	C,Proteus,IAR, Express PCB,Keil, Flashmagic.
